

April 9, 2020

The Honorable Nancy Pelosi
Speaker of the House
United States Congress
H-232 The Capitol
Washington, DC 20515

The Honorable Kevin McCarthy
Majority Leader
United States Congress
H-204 The Capitol
Washington, DC 20515

The Honorable Mitch McConnell
Majority Leader
United States Senate
S-230 The Capitol
Washington, DC 20510

The Honorable Chuck Schumer
Minority Leader
United States Senate
S-220 The Capitol
Washington, DC 20510

Dear Speaker Pelosi and Minority Leader McCarthy and Majority Leader McConnell and
Minority Leader Schumer:

The 58 undersigned advocacy organizations respectfully request that you include legislation to protect Medicaid non-emergency medical transportation (NEMT) in the next relief package addressing the COVID-19 pandemic.

NEMT has been a mandatory benefit in the Medicaid program since its earliest days but has never been explicitly required in statute. While medical appointments vary by state, beneficiaries use NEMT to access critical services including COVID-19 testing, kidney dialysis, substance use disorder (SUD) treatments, behavioral health appointments, and primary care preventive health visits. The NEMT benefit is used by only 7 percent of the Medicaid population and accounts for less than 1 percent of total Medicaid spending. Yet for those who rely most upon NEMT—the chronically ill, particularly those with ESRD—it can be a lifeline allowing beneficiaries to stay in their homes and out of the hospital.

Despite this dire need for NEMT services at this time as well as the need for the additional services that NEMT networks provide in this crisis, CMS is planning to make the benefit optional at the state level and was scheduled to release an RFI to that effect in December. Further, the administration's new Healthy Adult Opportunity Section 1115 waiver process encourages states to curtail the benefit.

Bipartisan legislation codifying the benefit and ensuring appropriate use is currently pending in both the House (H.R. 3935) and Senate (S. 2846), with the House bill unanimously reported from the Energy and Commerce Health Subcommittee last month. As our healthcare system strains to meet the needs of the COVID-19 pandemic, now is the time for Congress to act to ensure the NEMT benefit is available for Medicaid's most vulnerable beneficiaries.

The modest cost of transporting a beneficiary to a dialysis session or to a doctor's appointment to help manage multiple chronic conditions has been proven across multiple studies to be far

less than the costs incurred if such appointments are missed and beneficiaries requires more drastic and expensive interventions. In this time of crisis, it is more important than ever that we prevent such episodes and conserve healthcare resources for COVID-19 patients.

We urge you to take this opportunity—right now—to permanently protect NEMT in Medicaid, and we thank you in advance for giving this request your fullest consideration.

Sincerely,
